Designate

Designate monolith signs can incorporate a huge range of materials and finishes. Designate signs can be pared-down and simple or richly textured. Whichever combination of finishes you select, a Designate sign will be visually arresting.

Materials & Finishes

The range of possible finishes include: powder coating, stove enamelling, back painting glass or printing enamelled glass, vitreous enamelled steel, natural or coloured aluminum anodising and electroplating. Materials can be shot peened, sand blasted, or coated using the VeroMetal coating system in satin brass, satin bronze, satin copper, gunmetal, iron with a patina effect, satin nickel, stainless steel and satin tin.

Graphics can be, silk screen-printed, applied as laser-cut vinyl decals or digitally printed vinyl decals, digitally printed direct to media, mechanically engraved, chemically etched, or sand-blasted.

The Leas

<https://www.stevemarshdesign.co.uk/brands/designate-monolith-signs/>

The concept behind Designate is stunningly simple; a pair of proprietary structural posts formed from aluminium extrusions that hold infill panels at the faces and sides. Designate is specifically designed to accommodate virtually ANY material that is available in sheet form. Typical materials might include: stainless steel, aluminium, laminate, steel, brass, bronze, glass, natural stone, granite, acrylic, timber or any combination of the above.

Designate is designed to accept the HB Modular Sign System, the benchmark modular sign system.

Designate is available with a hinged door option that uses discreet side mounted plunger locks for security.

Below

Designate illuminated at night

Designate can be internally illuminated on one or both faces using economical and safe LED technologies.

LEDs are virtually maintenance free and last many times longer than conventional fluorescent lamps. LEDs have a running cost of around 20% of conventional lamps.

Designate is available up to 4 metres high with no restrictive, pre-set modules or sizes.

Designate can be robust enough for any urban location and refined enough for any corporate environment.

Materials

Finishes

Paint finished to RAL, BS and NCS references or colour matched to PMS (Pantone).

Designate can also utilise Vitreous enamelled steel panels.

Bronze VeroMetal coating

**VeroMetal
Coating System**

VeroMetal is a specialist coating of cold sprayable metal that can be applied to almost any surface.

VeroMetal is 95% metal and has all the features and properties of any hot-cast metal.
